Feed Delivery Management

Inbound Tracker

TAKE CONTROL OF HARVEST WEIGHTS AND FEED INVENTORIES

Step 1

Track inputs with touchscreen and external display

Step 2

Easily print scale tickets or export to TMR Tracker feed management software
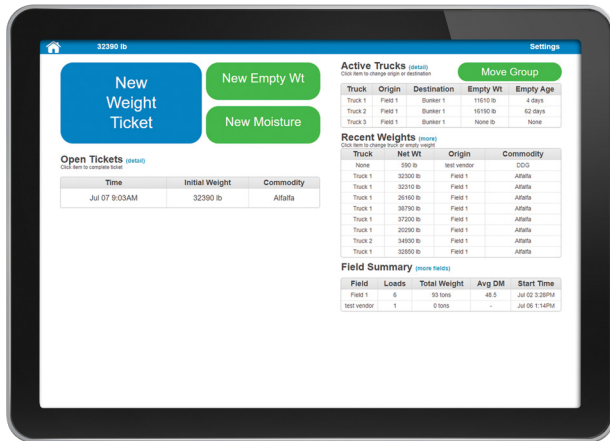

Easily monitor, track and export every feed delivery

The Inbound Tracker solution is designed to serially connect with almost any existing platform scale indicator. Comprised of a 15.5 in. touchscreen display as the primary interface, 9-character external display and remote transmitters for efficiency, Inbound Tracker provides an easy approach to managing feed deliveries and harvest weights.

Using the touchscreen interface, easily manage growers, trucks, commodities, fields and delivery locations. Effortlessly re-assign truck origins and unloading destinations. The included remote transmitters provide the ability to log each truck with a press of a button and export into TMR Tracker for up-to-date inventories. The solution enables an easy approach to tracking inbound deliveries and even includes a laser printer to easily print hard records.

Explore Feed Management Software

TMR Tracker provides progressive feed management software tied directly to the mixer. Easily export Inbound Tracker data and leverage the most impactful tools for managing feed inputs.

Check with Topcon sales representative for feed management software integration details.

Kit components:

15.5 in. Touchscreen Display

Power	Input:100- 240V AC Output: 19V/3.42A or 12V/5.42A DC 65W 19V Adapter bundled
Dimensions	15.5 in. x 13 in. x 1.67 in.

9 Character External Serial Remote Display

Power	Input:115/300 VAC 50/60 Hz
Power Consumption	60 Watts Max
Character Height	2.6 in.
Enclosure Rating	IP65
Ambient Temp	-15°F to 130°F

5 Units of 2-Button Remote Transmitters

Range	Up to 350 ft.

USB Keyboard

Laser Printer
