Nutrient Tracking Software
Digi-Star NT 560
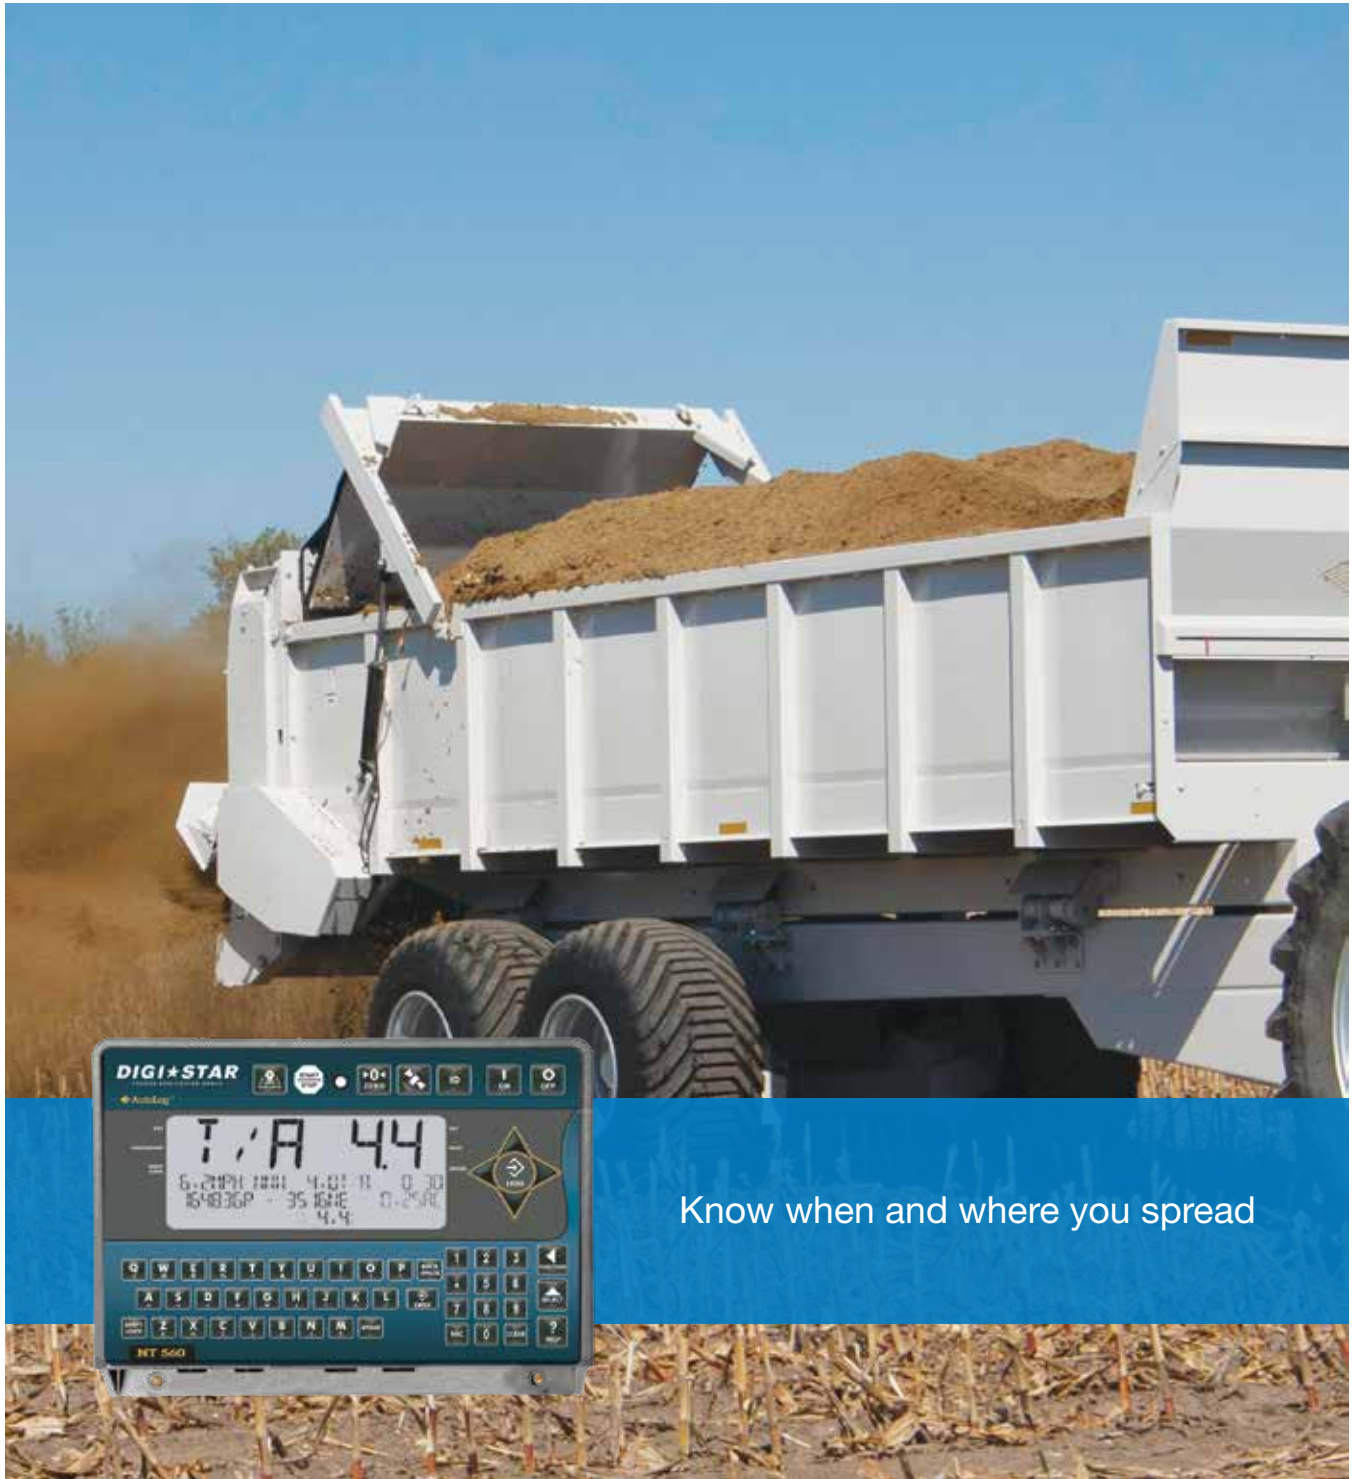

Know when and where you spread

Indicator displays actual tons/acre or lbs/acre

View and react to tons/acre or lbs/acre reading by speeding up or slowing down

View and change the 26 character field name

View and change the 6 character ID

Software to create custom reports

Calculating the nutrient value of your manure is easy with scales on your spreader

www.topconagriculture.com

Record your Nutrient Application Precisely

Want to cut down on waste while generating easy reports for environmental regulations? The Digi-Star NT 560 will solve both challenges by combining weight information from scales and GPS data to accurately verify manure application with ease.

NT 560 with AutoLog™
Automatic Start/Stop Function (patent pending)
No need to remember to push the Start/Stop button when unloading your spreader. With AutoLog, it is done automatically, no matter who is operating your spreader.

Transfer accumulated data to a flash memory device via USB port.
