## NEW CT-MOUNT OPTION

Digi-Star has introduced a new CT Mount that is designed for high capacity stationary applications such as feed bins or platform scales. In the new design we are replacing the polyurethane shim with a steel shim. It is also recommended that stationary applications use a steel plate (#400419) to help protect the concrete surface from damage due to point loading.

For Stationary Applications please order:

- ★ #35017 Mount – CT Steel Shim
- ★ #400419 Plate – for CT mount

For Mobile Applications please order:

- ★ #404109 Mount – CT Urethane Shim

I am also enclosing is a new CT-Mount Installation Instruction sheet which is also available on our web page in multi-languages ([www.digi-star.com](http://www.digi-star.com)).

If you have any further questions please contact Digi-Star at (920) 563-9700.
