Product: EZ3500

Issued Date: June 15, 2006

Subject: EZ3500 using both EZ Feed Software and Trioliet Shiftronic mixer.

Description:

Both EZ Feed & Trioliet use the serial output of the Digi-Star indicator to update their system with weight information. In order for both systems to share this information Digi-Star has updated the serial port on the EZ3500 so that both can be connected with a Y cable.

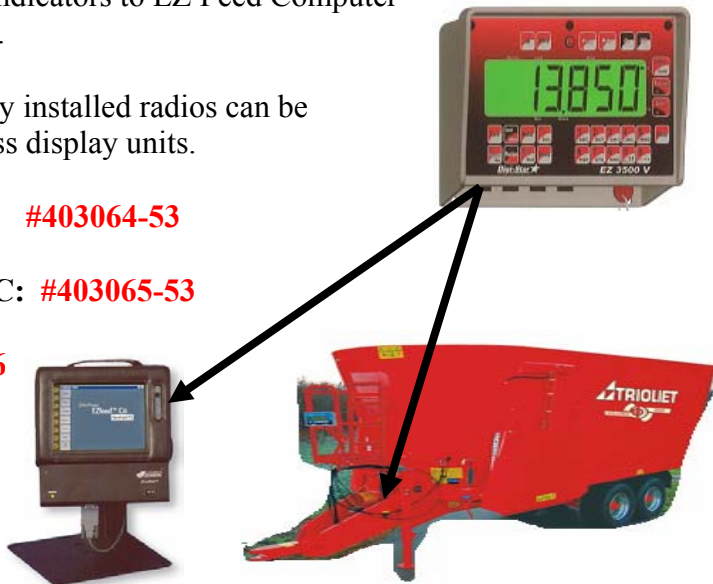

Details & Part Numbers:

- ★ New J904 serial port provides transmit ports to EZ Feed Computer and Trioliet Shiftronic mixers.
- ★ Y cable connects EZ3500/V indicators to EZ Feed Computer and Trioliet Shiftronic mixers.
- ★ EZ3500/V models with factory installed radios can be used with Cab Control wireless display units.

EZ3500 EZFD w/DK/Ser/Rem/RC: #403064-53

EZ3500V EZFD w/DK/Ser/Rem/RC: #403065-53

Trioliet/EZ Feed Y Cable: #404346

Set Up Notes:

Set the indicator "SCOREBOARD MODE" (D.A.N. 213). Short Form Entry to "11" and install the new Y cable. Make sure that your indicator software version is EZ2 4.D or newer.
